

Scotts® Nature Scapes® Advanced Mulch is first to bring innovation to mulch

How it works

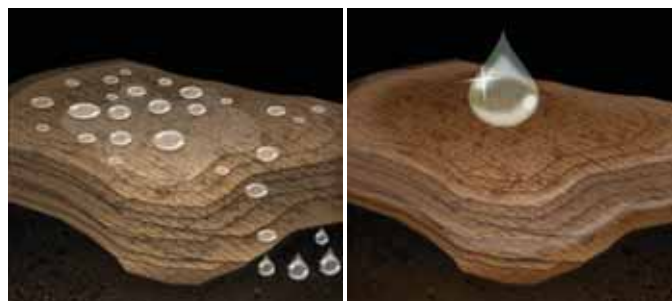

We added an aligermer compound to Nature Scapes® Advanced Mulch that changes the way water interacts with mulch, while still able to provide 1 Year Color Guarantee!!

Because Nature Scapes® Advanced Mulch is Water Smart®

- It uses up to 30% less water*.
- Creates less water run off.
- Helps eliminate dry soil spots around plants, channeling water to the plant.
- Helps to conserve water usage when watering plants.

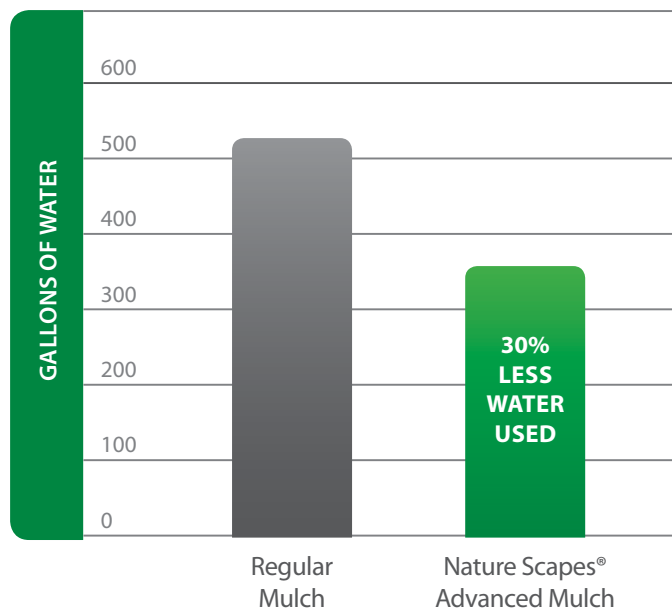

* Than ordinary mulch which does not contain color retaining materials.

Regular Mulch is Hydrophobic (water avoiding) and causes water to bead, run-off and uneven channeling result in wasting water.

Scotts® Nature Scapes® Advanced Mulch is Hydrophilic (water seeking). Water will not bead but rather coat the mulch and drain evenly.

Water Used to Care for Plants

Scotts® Nature Scapes® Advanced Mulch

Color Guard® Advanced

Nature Scapes® Advanced Garden Mulch keeps its color for one year, guaranteed!

- No graying or fading like ordinary mulch without Color Guard® Advanced.
- Saves time and money.

Prevents Weeds Naturally*

To use mulch as a natural weed inhibitor, you need to put down at least 3 inches.

- Weeds need light and warm soil to survive.
- Mulch prevents weed seeds or roots from being activated.
- Weeds won't have enough energy to push through.

*A three-inch layer of Scotts® Nature Scapes® Mulch naturally prevents weeds by blocking growth and access to sunlight.

Water Smart®

Nature Scapes® Advanced Garden Mulch is designed to save up to 30% more water than ordinary mulch.

- Doesn't repel water like ordinary mulch
- Water runs down evenly through Nature Scapes® Advanced Garden Mulch.
- Helps eliminate dry spots around plant.

Year-Long Color. GUARANTEED! See the Difference.

Reprocessed Colored Mulch

- Color fades quickly.
- May steal nutrients from plants.
- Made with waste wood.

VS.

Nature Scapes® Advanced Mulch

- ColorGuard® formula keeps color lasting all year.
- Provides organic matter to the soil, beneficial to plants.
- Made with natural forest products.
- Safe for plants.
