

GRASS SEED

A Blend of 4 Top-Rated Tall Fescues.

Atlantic Mulch is excited to announce that we will be carrying a 0 weed seed, 4 way blend from TMI this year. Individually these fescues have proven themselves to be top performers with extraordinary turf quality, heat and drought tolerance and a lush dark green color. Now, four of these top-rated fescues have been blended; 3rd Millennium, Traverse, Honkey Tonk, and Aztec II.

WHAT'S IN THE BAG!

3rd Millennium & Traverse

were 2 of the only 22 varieties to score 6.8 or better in the NC1 (Raleigh) location of the NTEP trials for the Mean Turfgrass Quality.

The presence of rhizomes creates a **self-repair potential which speeds establishment, improves tolerance, and increases recovery** from damage as well as resisting Brown Patch which can be devastating to tall fescue turf!

Honkey Tonk & Aztec II

support the mix through their strong performance capabilities.

Honkey Tonk is ideal for any transition zone and any region of turf-type tall fescue adaptation and use.

Aztec II exhibits excellent performance and the ability to outperform other varieties even under low nitrogen fertilization, quickly establishing a dense, dark green, drought tolerant turf.

We combine top quality products, and competitive prices, with superior service.
