

# 2020 *Product Catalog*

LIVE OUTSIDE.®

**There is an art and a science to living outside.** Creating an *experience so perfect* you'll never want to go back inside takes **more** than a traditional hardscape mentality.

It takes a **love of nature** so strong you can **TASTE IT** and **SMELL IT** and **FEEL IT** in your **DNA**. It takes a *craft brewer's passion* for hardscapes that borders on *obsession*. It takes a **whole new way of thinking** about pavers and walls.

We call it *Paveology*, and it's the *difference* between liking your new outside environment and **living it**.

NewLine donates a percentage of our proceeds to Chesapeake Bay Foundation for every square foot of our permeable interlocking concrete pavers (PICPs) that are manufactured and sold either residentially or commercially. PICPs are important in this fight because they help filter pollution from stormwater runoff as well as reduce runoff from rainstorms by as much as 100 percent. Rooted in our live outside philosophy and compelled by our care for this wonderful natural resource, our mission at NewLine is to “give back to the Bay” at every opportunity. We hope you can join us in this mission. The Blue Crab logo is part of our “NewLine Cares” effort, which shows our support of the Chesapeake Bay and our environment in general. Look for the Blue Crab logo next to our permeable paver products.

# *Paver Finishes*

---

## FINISHES MAKE A DIFFERENCE.

Different tastes mean different needs in selecting your hardscape products. We help make the process easier by providing our pavers with a variety of face finish options. Whether it's smooth, textured, clean, or antiqued, we have the look you need.

### *Chamfered*

A classic finish that is characteristic of traditional brick. Features beveled edges.

- Holland Stone™
- Aqua-Flo™
- Enviro-Flo™
- Terrace Stone™ Smooth
- York Tile™ Smooth

### *Traditional*

With rounded "pillowed" edges, the traditional finish provides a soft, padded appearance to the paver.

- Classic Cobble™
- Classic Cobble™ 4-Piece
- Classic Cobble™ Circle Kit
- Alleyway Cobble™

### *Aged*

Provides a time-worn, weathered effect to the look of the paver.

- English Cobble™
- English Cobble™ 4-Piece
- English Cobble™ Circle Kit

### *Slate*

This specialty finish gives the patio tile a texture similar to Pennsylvania Bluestone or slate.

- York Tile™
- Terrace Stone™

*terrace stone in mountain ridge*

An oversized, three-piece slab system, Terrace Stone™ is designed to be laid either as a standard paver or as a permeable pavement system. Each pallet contains three sizes, allowing you to lay a variety of random patterns. Terrace Stone is available in both a slate-face finish and a smooth-face finish.

## Classic Cobble™

*classic cobble™ in fieldstone*

The Classic Cobble™ in 6" x 6" and 6" x 9" provides incredible ease of use and flexibility of design. And with soft, rounded corners and a domed "pillow top" surface, Classic Cobble delivers an old world feel. The two sizes are sold separately, but often are used together in a variety of patterns.

# Alleyway Cobble™

Alleyway Cobble™ provides the appearance of an old granite paver that has been in the ground for centuries. This 4-piece system is crafted with a natural stone-cleft finish and rounded edge. It can be used as a standard paver or permeable interlocking concrete pavement (PICP) depending on how it's installed.

## SHAPES & SIZES

*enviro-flo in granite*

Turfstone™ is a thick, square slab with open grids that allow water to permeate through the system. Turfstone can be used for over-flow parking, fire lanes, erosion control, and parking lots where permeable paving is required. The open voids can be filled with drainage aggregate for maximum infiltration or soil to allow greenery to grow.

NOTE: Soil and turf will reduce the permeability of the system but will enhance the overall look and appearance.

*kodah in ash*

The clean, linear lines of our Kodah™ wall deliver the rugged look of chiseled limestone with gracefulness. As with all Rosetta® products, the uniform rise of Kodah means fast installation and a strong, safe structure. And with four separate unit shapes with finished front and back faces, your design options are limitless. Kodah can be utilized seamlessly on both casual rustic and modern contemporary projects.

## FEATURES

- 4 large, multi-textured unit sizes imitate chiseled limestone
- Modern linear character compliments plants and flowers
- Consistent block heights make installation a snap
- Use for retaining walls or freestanding seating walls

*stonegate contemporary in fieldstone*

The smooth, uniform face and finished edges of Stonegate Contemporary® create a modern, sleek attractiveness. This versatile wall system permits the easy creation of gravity retaining walls up to three feet in height (walls taller than three feet can be installed with proper engineering and the use of geosynthetic reinforcement). Stonegate Contemporary is also great for parapet walls, pilasters, columns, stairs, and outdoor living elements such as kitchens, fireplaces, fire pits, benches, and more. Like traditional Stonegate®, Stonegate Contemporary has three finished face unit sizes, which simplify the creation of random patterns and assure stunning results.

*outcropping in canyon*

The large dimensions of the Rosetta® Outcropping™ units allow you to create grand structural walls in a scale that is both believable and inspiring. The Outcropping collection was designed with 12 unique size units and 24 unique stone textures to create the most natural appearance possible. Fully engineered to exacting specifications, the Outcropping collection is not limited by the inconsistent properties of natural stone, yet maintains its appearance and feel. Given its large size, Outcropping is designed to be machine-laid, making installation fast and easy.

## FEATURES

- Beautiful weathered stone textures
- Large interlocking units create a fully engineered, extremely strong, structural retaining wall
- Consistent dimensions = fast installation
- All Outcropping units average 18" +/- depth

# Installation Accessories

Polymeric Sand	Concrete Adhesive HP
Polymeric Stone Dust	Base
Nails	Sealers & Cleaners
Edging	Landscape Fabric
Polyurethane Adhesive XP	Geo-Grid

GATOR MAXX G2 is made with a state-of-the-art manufacturing process.

Specifically, calibrated sand is mixed with sophisticated intelligent polymers. This new generation of intelligent polymers neutralizes haze and dust. The polymeric sand application is now dust free and haze free.

No blower is needed, and the intelligent polymeric sand requires only one watering. GATOR MAXX G2 is recommended for a variety of uses including pool decks, patios, footpaths, driveways, parking spaces, pavements, etc.

Available in Beige, Slate Grey, Ivory, and Black Diamond.

## Color

The natural materials that we use in our paving stones and retaining wall products deliver a range of colors that closely match color samples in catalogs, spec books, color swatch books, and online photos. However, NewLine cannot guarantee exact color matching. Our pavers and walls can vary slightly in color depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn't be expected to be an exact match. Final color selections should be made at your local dealer from stock product or displays. NewLine always recommends immediately verifying the product and color upon receipt. If there are any discrepancies, contact your local dealer before continuing your project. Installation of the product constitutes its acceptance. Proper installation enhances the overall color of pavement. Units should be randomly picked from at least two pallets when installing. This creates an attractive and subtle blending of color.

## Efflorescence

Our warranty does not apply to efflorescence. Efflorescence is a whitish, powderlike deposit that can appear on the surface of concrete pavers. When cement hydrates, calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide (from the air) to form water-insoluble calcium carbonate, which is then called efflorescence. Efflorescence does not have an effect on the structural performance or durability of the concrete pavers. NewLine includes admixtures in their concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. NewLine does not warrant concrete pavers and/or walls that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months following installation. It may remain for months or some of it may wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence-removers. Before purchasing or applying any chemicals to remove deposits, please consult your local dealer for efflorescence removal chemicals.

## Polymeric Haze

Polymeric haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner; you are advised to contact your contractor or the polymeric sand company used for advice on recommendations. NewLine accepts no responsibility or liability for this occurrence.

## Construction Residue

A by-product of cutting with a saw is residue-filled water or concrete dust. Residue-filled water or re-hydrated dust can cling to the surface and leave a concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can also happen through soil disturbance or environmental elements.

These contaminants should be removed immediately but do not affect the integrity of the product or your installation. NewLine accepts no responsibility or liability for these occurrences.

## Compactor and Snow Removal

NewLine pavers with textured surfaces have high and low points on the surface that give it more of an aesthetic appeal. However, pavers with textured surfaces are susceptible to surface scuffing when they are compacted into place. Therefore, these types of pavers should always be compacted with plate compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the NewLine pavers. This system will help ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet or cardboard. Manufacturers of plate compactors are able to recommend other products that also can be used for this purpose. For further information on interlocking concrete paver details, technical information, and recommended construction practices, visit ICPI at [www.icpi.org](http://www.icpi.org).

A plate compactor should not be used on our York Tile or Overlay pavers. Also, snow removal equipment should have the proper spacing, bumpers, and rubber blade guards to protect the surface of the pavers. NewLine will not be held responsible for damage caused by the misuse of compaction or snow removal equipment which leaves scuff marks or burns on pavers.

## HARDSCAPE LIFETIME TRANSFERABLE WARRANTY

NewLine Hardscapes backs our manufactured paver and wall products with a lifetime transferable warranty, guaranteeing our products against manufacturing defects. This warranty is for residential construction only, and is applicable where products have been correctly installed to meet industry specifications. Color variances and the appearance of efflorescence do not constitute a warranty claim. Any defective products will be replaced; however, replacement labor and transportation costs are not included in this warranty. All warranty claims must be made prior to the removal or disposal of the defective product. We will honor this transferable warranty with a proof of purchase (invoice or delivery ticket).

The foregoing warranty is exclusive and in lieu of all other express or implied warranties of any kind. FURTHERMORE, NEWLINE DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY AS WELL AS ALL IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE. Newline shall not be liable for any consequential damages or incidental damages arising from any warranty claim made against it.

NOTE: This warranty does not apply to any breakage, chipping, or other deterioration that was caused by improper design or installation which does not comply with applicable codes, the ICPI, NCMA, and recognized work procedures. Please visit [www.icpi.org](http://www.icpi.org) or [www.ncma.org](http://www.ncma.org) for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligent act on the part of the purchaser, owner of the building, installer, or any third party.

## AN EXCITING NEW TOOL FOR LANDSCAPE INSTALLERS:

You can now create fully-interactive tours of your client projects. These tours can help your clients visualize their potential new project, helping you close sales more effectively and

efficiently. It also elevates you above your competition, by showing your clients a more realistic design.

Try it out on your next project. The NewLine

Design Studio is completely free-of-charge to installers. Just visit our application page at [www.newlinehardscapes.com/DesignStudio](http://www.newlinehardscapes.com/DesignStudio)
